I lost my "What if everyone's a different gender?" button at PDF so I figured a google search for the text might find me someone who sold the button. Little did I know that I would find an amazing button store with hundreds of cool buttons for at [Nancy's buttons](#) !

Some of my favorites are in the math and programming sections:

- "There are 10 kinds of people, those who are comfortable with binary, and those who aren't "
- " $x^n + y^n = z^n$ has no integer solutions other than 0 for $n > 2$ I have a wonderful proof, but it won't fit on a button"
- "One of the main causes of the decline of the Roman Empire was that, lacking zero, they had no way to indicate successful termination of their C programs"

Also check out sections on Bush, religion, pagan, magic, logic and many more!
