This Wednesday [Sandbox gathering](#) we travel even further down the quantum Rabbit Hole in a quest for answers to age old questions. Discover remarkable possibilities regarding what happens to our consciousness before and after death. Some call the film we will watch together, Spirit Space <http://spiritspacemovie.com/> "What the Bleep do we know? meets the afterlife".

Challenging Quantum physics theories and how they affect how we perceive the world anciently and today, both spiritually and scientifically. This film acts as a progressive "travel log" for human life attempting to answer questions that mankind has been seeking since the dawn of thought. What were we before we came here? Why do we need to be here? What happens after we die?

With spiritual inspirations by Toltec author don Miguel Ruiz and insights by quantum physicist Dr. Fred Alan Wolf and lunar astronaut Dr. Edgar Mitchell founder of the Institute of Noetic Science, Spirit Space even opens cases from individuals who have been hypnotically regressed to a point between lives-after death, and even before birth. Not only does the film grapple with reincarnation, the spirit world, and the nature of the human soul it also tackles equally sticky questions such as "Is there a Heaven and Hell?" and "What is a spirit?". Viewers with a penchant for skepticism will balk at the lack of physical evidence to back up the claims in Spirit Space, but the film remains a reassuring voice, affirming that our existence is not limited to the boundaries of our mortal flesh...

Featuring:

[Dr. Fred Alan Wolf](#) (star of *What the Bleep do we (k)now?* and *The Secret*)
