I have read about issues with the official story of 9/11 for several years and watch videos on YouTube but this is the first time PBS (the US version of the BBC) has covered it in a 90 minute documentary. At the very least there are some very strange hard evidence on 9/11 that contradicts the official story and at the most the US government was involved. This is based on scientists and engineers that have reviewed the evidence. Either way worth reading and watching and forming your own opinion.

A 9/11 documentary aired on PBS and available for free viewing on the PBS website is going viral. '9/11: Explosive Evidence - Experts Speak Out' was produced by Architects and Engineers for 9/11 Truth, a courageous group of over 1,500 architects and engineers which has dared to ask hard questions about 9/11 and present the disturbing hard evidence.

In this beautifully produced, 90-minute documentary, over 40 scientific experts share their professional insights about the events of 9/11.

As of Sept. 8, 2012, the [PBS website shows](#) this 9/11 documentary is the second most watched documentary of the week on PBS. According to [this Digital Journal article](#), it is also the most shared of all PBS documentaries at this time. You are invited to watch this highly educational film and spread the word to your friends.

In addition to these 1,500 architects and engineers who are calling for a new, impartial investigation of 9/11, over 1,000 government and military officials, professors, pilots, and 9/11 survivors and family members have publicly stated that the 9/11 Commission Report is fatally flawed.

Among these respected individuals are two former U.S. Senators, a former FBI director, the former president of Italy, and many more. To explore their compelling statements, [click here](#).

Hundreds of major media articles also raise serious questions about the official story of 9/11. You can find a two-page summary of dozens of these articles with links for verification at [this link](#). A longer ten-page summary at [this link](#) goes into much more detail.
