Related Categories: Sandbox, Spirit, Creating, Movies

This Wednesday [Sandbox gathering](#) we view and discuss the movie The Quantum Activist and learn about the scientific evidence for God and how you can create the reality you want. There is a revolution going on in science. A genuine paradigm shift. While mainstream science remains materialist, a substantial number of scientists are supporting and developing a paradigm based on the primacy of consciousness.

Suggested donation \$20 for dinner and movie.

Please RSVP [here](#).

Dr. Amit Goswami, Ph.D, a pioneer of this revolutionary new perspective within science shares with us his vision of the unlimited potential of consciousness as the ground of all being, and how this revelation can actually help us to live better. The Quantum Activist ( <http://quantumactivist.com/> ) tells the story of a man who challenges us to rethink our very notions of existence and reality, with a force and scope not felt since Einstein. This film bridges the gap between God and Science. The work of Goswami, with stunning precision and without straying from the rigors of quantum mechanics, reveals the overarching unity inherent in the worlds major religions and mystical traditions.

Meet the man behind the message as Dr. Goswami tells how he moved away from the religious teachings of his childhood, to seek his path in nuclear and theoretical quantum physics, and how he has come full circle, through quantum insight, back to the very religious axioms offered as a youth. With a poignant relevance to the problems of our day this film follows Dr. Goswami as he demonstrates how our mistaken views of reality have led to our current environmental, social, economic and spiritual crisis; as well as the means of correcting these errors. At stake is nothing less than our survival upon the planet. The Quantum Activist is a film for our time. It is a film for all time. It is a film whose very subject transcends time.

Witty, profoundly insightful and colored with humor, the Quantum Activist brings you Amit Goswami's vision of the universe. Steeped in the verifiable facts of Quantum Mechanics, Dr. Goswami dares to pose the question, "What are you doing to participate in the creation of the reality we all share?"

Amit has recently appeared in the blockbuster movie "What the Bleep Do We Know?", the award winning "The Dalai Lama Renaissance" and authored over a dozen books from textbooks on quantum mechanics to consciousness and the New Science.

The movie and discussion begins after dinner at 8pm. I invite you to join us, though as always what ever choice you make you will be honored in.
