This Wednesday Sandbox gathering we explore hot wax play. There is something erotic about hot wax dripping onto your body - first overcoming the fear, the sting of the heat, then the spreading sensation as the wax cools and hardens. A crust forms on your skin, protecting against the next wax drop, but also constricting movement. You might start on the chest or belly, but more daring is hot wax on the nipples. When you are done the wax is removed with a blunt knife and ice, giving you a permanent body mold.

Safety is very important with hot wax and we will control the temperature of the wax to avoid burning. Using a crockpot to heat the wax with a thermometer to test it. Plus we will have ice on hand to cool things off if needed. A wise tip is for the pourer to test the wax on the back of their hand first before pouring on someone else.

The playshop begins after dinner at 8pm. I invite you to join us, though as always what ever choice you make you will be honored in.
